

diyivi

What is it?

- DIY tool for Yivi disclosures between users, not user-to-website.
- Attributes are not shared before *both* parties have disclosed.
- Some day: also for creating and verifying signatures.

Demo time

- I met Bart online and we email back and forth.
- I would love to know that bart@cs.ru.nl is really Bart Jacobs.
- Bart would probably also like to know the same about me.
